Dear Hiring Manager at ShareTec,

I am interested in the Software Engineering position at ShareTec because it would give me the opportunity to modernize an old product. I had some experience modernizing programs when I worked at NISC. However, I feel that my studies at the University of Illinois have prepared me very well at learning how to use modern technologies and how to deploy them. I have a passion for doing the job the right way and sticking to the best practices. Modernizing an older program sounds like the type of work that I would love. Thank you for considering my application.

Sincerely,

Adam McNeil
